DETAILED ACTION

Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C.
 121:
 - I. Claims 1-28, 31-37 and 38, drawn to a valve assembly adapted to be positioned into a urethra in a mammal, including humans and to a method for emptying a patient's urine bladder, classified in class 600, subclass 029.
 - II. Claims 29 and 30, drawn to a valve adapted to be positioned into a urethra, classified in class 604, subclass 249.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions of **Group I** and **Group II** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the valve assembly does not require a valve including at least a tubular vane housing.

Application/Control Number: 10/626,038

Art Unit: 3736

The subcombination has separate utility such as a valve for allowing

Page 3

saline to flow from a source bag to a collection location.

Because these inventions are distinct for the reasons given above and

have acquired a separate status in the art as shown by their different

classification, restriction for examination purposes as indicated is proper.

3. This application contains claims directed to the following patentably

distinct species of the claimed invention:

Species:

a) a magnetic controlled valve;

b) an electro-magnetically controlled valve;

c) a mechanically controlled valve.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed

species for prosecution on the merits to which the claims shall be restricted if no

generic claim is finally held to be allowable.

Currently, claims 1, 29, 30 and 38 are generic.

5. Applicant is advised that a reply to this requirement must include an

identification of one of the species from each group of species that are elected

consonant with this requirement, and a listing of all claims readable thereon,

including any claims subsequently added. An argument that a claim is allowable

or that all claims are generic is considered nonresponsive unless accompanied

by an election.

Application/Control Number: 10/626,038

Art Unit: 3736

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 4

- 7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 8. A telephone call was made to Matthew E. Connors on December 03, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3736

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikita R Veniaminov whose telephone number is (571) 272-4735. The examiner can normally be reached on Monday-Friday 8 A.M.-5 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max F Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
